SWEEPING  
SOLUTION!**

# BLOVAC<sup>®</sup> CLEANER

PAT.NO.1819464

Clean working environment is indispensable for safety of operation and protection of equipment

**BLOVAC CLEANER can easily be used only by attaching it on an ordinary pail can**

use a pail of 300mm (11-3/4") in outside diameter

**BLOVAC CLEANER FOR INDUSTRIAL USE WORKING WITH COMPRESSED AIR**

**BLOVAC CLEANER CLEANSE UP VARIOUS JOB SITES WITH A VARIETY OF ADVANTAGEOUS FEATURES**

**BLOVAC CO., LTD** TOKYO, JAPAN

## Advantageous Features

- ① Not only metal chipping but also water, oil, dust, bottom sludge or mixture can completely be sucked up.
- ② It can easily be used only by attaching it on an ordinary pail can. (20 liters)
- ③ It has no moving parts: will not wear out.
- ④ It eliminates combustion and electric shock hazards.
- ⑤ It is provided with a ball check which automatically stops the suction when the receiver becomes full of a liquid being sucked up.
- ⑥ Maintenance and down time is eliminated. (it can be completely emerged in cleaning fluid)
- ⑦ Thanks to its unique design it is very easy and light weight.
- ⑧ Able to work with your own air compressor.

## Instructions for use

- ① Firstly put it on an ordinary pail can in such manner as to ensure that the pail can edge may be just fitted into the groove in the rubber packing of it.
- ② Close the air valve in it and connect the air hose to it by a quick-connect coupling.
- ③ Open the air valve in it.  
It will start to blow air off from an ejector and suck the target matters into a suction nozzle.

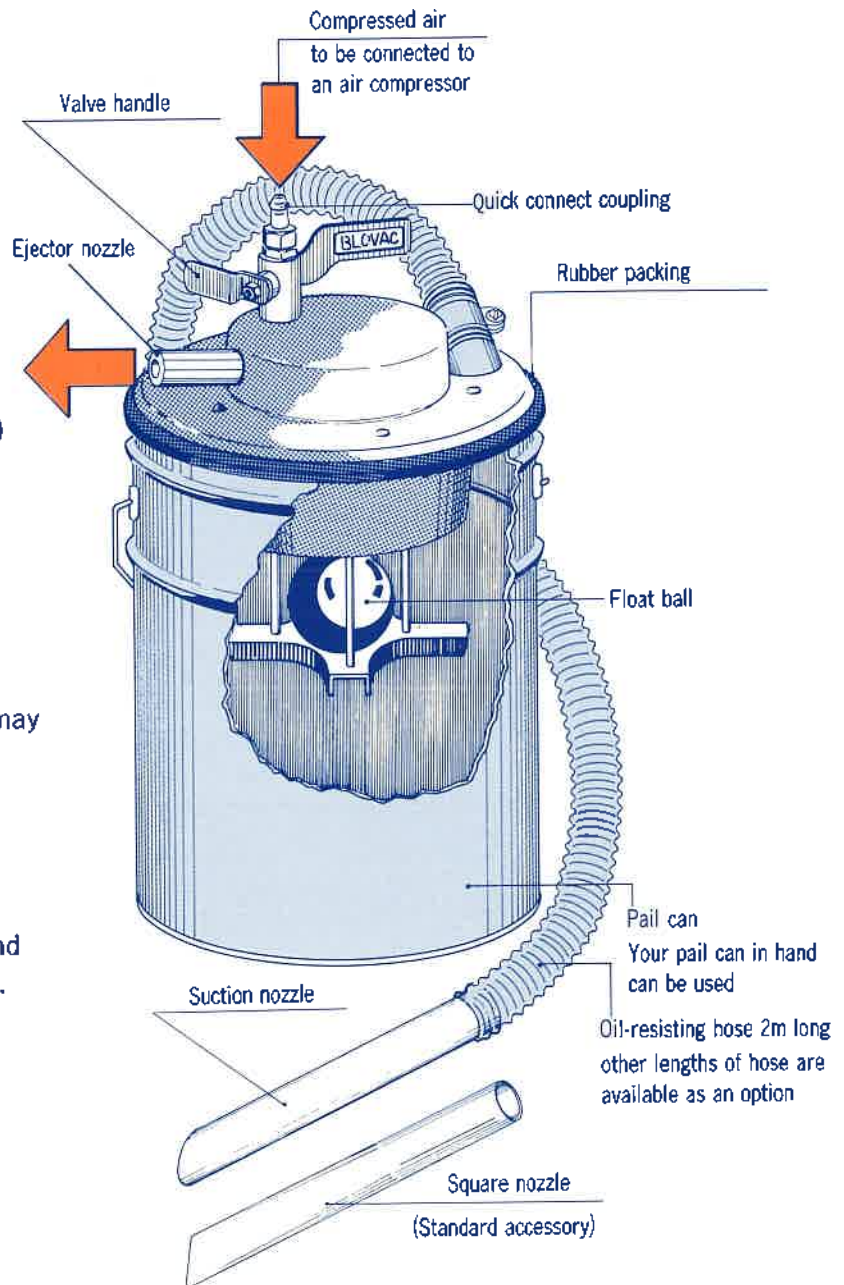

### ※ Caution

It is not suitable for the suction of solvent, chemicals or the like.

## Option

### Filter (for dust)

Useful for suction of dust and the like
